Financial Support:

There was no internal or external financial support for this study.

Conflict of interest statement:

Dr. David Dean has a Research Collaboration Agreement with EnvisionTEC, Inc. (Dearborn, MI), a 3D printer manufacturer whose devices are used in this project. David Dean is the lead inventor of patents assigned to, has received compensation from, and has an ownership stake in, Osteoplastics, LLC (Shaker Heights, OH). The technology covered by some of those assigned patents is used in this study.
